

JAYDEEP PRAJAPATI

Varanasi, UP | +91 9131819391 | jaydeepprajapati30941@gmail.com | github.com/jay-123-oss

Professional Summary

Computer Science Engineering student with hands-on experience building software, web applications, AI/ML systems, and computer-vision projects. Strong foundation in Python, JavaScript, databases, APIs, machine learning, and modern development tools, with practical experience taking projects from implementation through testing, debugging, and deployment.

Work History & Projects

Front-End Development Intern

2026

Saiket Systems - Virtual

- Completed a virtual front-end development internship, successfully delivering assigned technical projects.

Project Developer

Aug 2025 - Present

Trinetra (Offline Vision Assistant)

- Developed a local-first computer vision system for real-time environmental perception and safety assistance.
- Implemented object detection and tracking using YOLO-based models with optimized inference pipelines.
- Integrated depth perception using Depth Anything V2 and ARCore Depth capabilities for spatial awareness.
- Built components for real-time frame processing, object tracking, motion analysis, and risk detection.

Project Developer

Early 2026

AI Agent Travel Planning System

- Built an AI-powered travel planning system using LangGraph and LangChain.
- Designed an agent-based workflow for processing user requirements and generating structured travel plans.
- Integrated PostgreSQL for persistent application data and developed API-based backend functionality.

Project Developer

Late 2025

Student Machine Learning Suite

- Developed machine-learning solutions for student-related prediction and analysis tasks.
- Built data-processing and model-training workflows using Python, Pandas, NumPy, and Scikit-learn.
- Created a FastAPI backend to expose trained models through APIs.

Project Developer

2024 - 2025

Web Development Projects

- Developed responsive websites and web applications using HTML, CSS, JavaScript, PHP, MySQL, and Bootstrap.
- Implemented backend functionality, database integration, responsive interfaces, and API-based features.

Skills

- Languages:** Python, JavaScript, PHP, SQL, HTML, CSS, Kotlin
- Frameworks:** FastAPI, Flask, React, Bootstrap, Pandas, NumPy, Scikit-learn
- AI/ML:** Machine Learning, Deep Learning, Computer Vision, YOLO, ONNX
- Databases:** MySQL, PostgreSQL
- Tools:** Git, GitHub, REST APIs, Android Studio, CameraX, ARCore, LangChain
- Methods:** Debugging, dependency management, model deployment, API workflows

Education

Degree Obtained: Bachelor of Technology in Computer Science Engineering (Started: 2024 | 3rd Year | Academic Score: 70%)

School Name: Gyan Sagar College of Engineering

Certification & Training: Artificial Intelligence Agents (Kaggle), AI Workshops (GeeksforGeeks)
